

# How To Add Files

**1) Open the file using Excel and choose the csv format that is highlighted in the picture**

## 2) Add the file to the project the normal way

## 3) When the program is running enter the file name

```
=====
          ECLAT Algorithm
=====
Enter the minimum support count
1
Enter the minimum confidence value
2
Enter the file name
(Make Sure the file name is something like "my_file.csv" without the quotes and make sure that it is a csv file that doesn't use the UTF [more in the attached PDF])
```
